

Dear Members of the FCC:

If it wasn't for XM Radio, I would be a lost. XM provides me with many services that I can't get in my area. #1 - We live in between some hills that keeps many regular radio stations from getting to us. #2 - Many of the stations around our area do not provide the kind of programming that I want ie - no Jazz stations, no In-depth weather stations, the kind of variety in programming that I want. #3 - XM provides many other services that regular radio does not such as weekly programming listings sent to my mailbox, and I don't have to listen to non-stop advertising.

I urge you to please let me hear what I pay for. Regular radio does not provide this. My service from XM has been nothing but the best! Please reject NAB's petition 04-160. Thank you for your time.
